

Workflow Overview

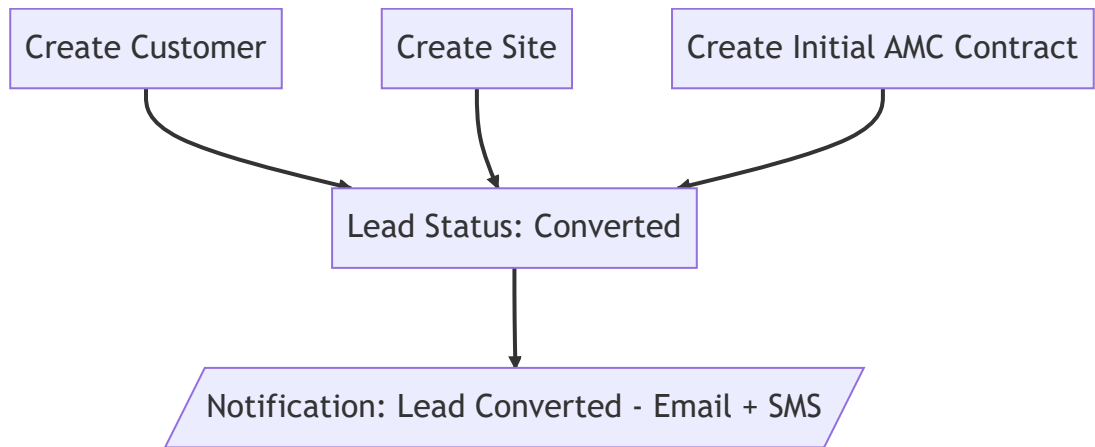

Project: Aarvii CCTV AMC Management System **Phase:** D0 — Project Foundation Documentation **Source of truth:** [requirements-freeze-v1.md](#)
(Approved & Frozen, V1)

Six core workflows derived from the frozen requirements. Statuses and transitions are exactly those approved in the freeze document.

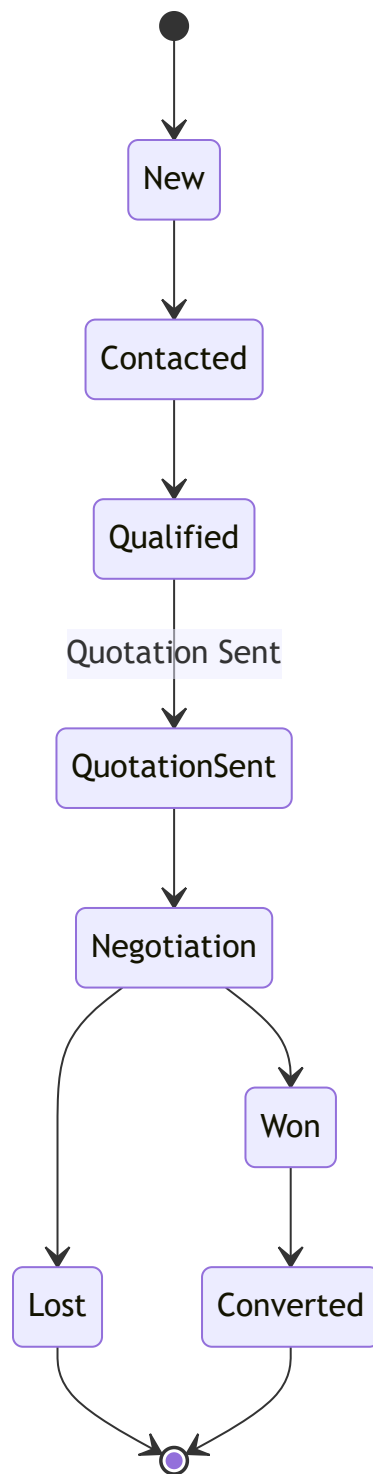

1. Lead Conversion (\$10)

Website inquiries automatically create leads; a converted lead creates Customer + Site + Initial AMC Contract.

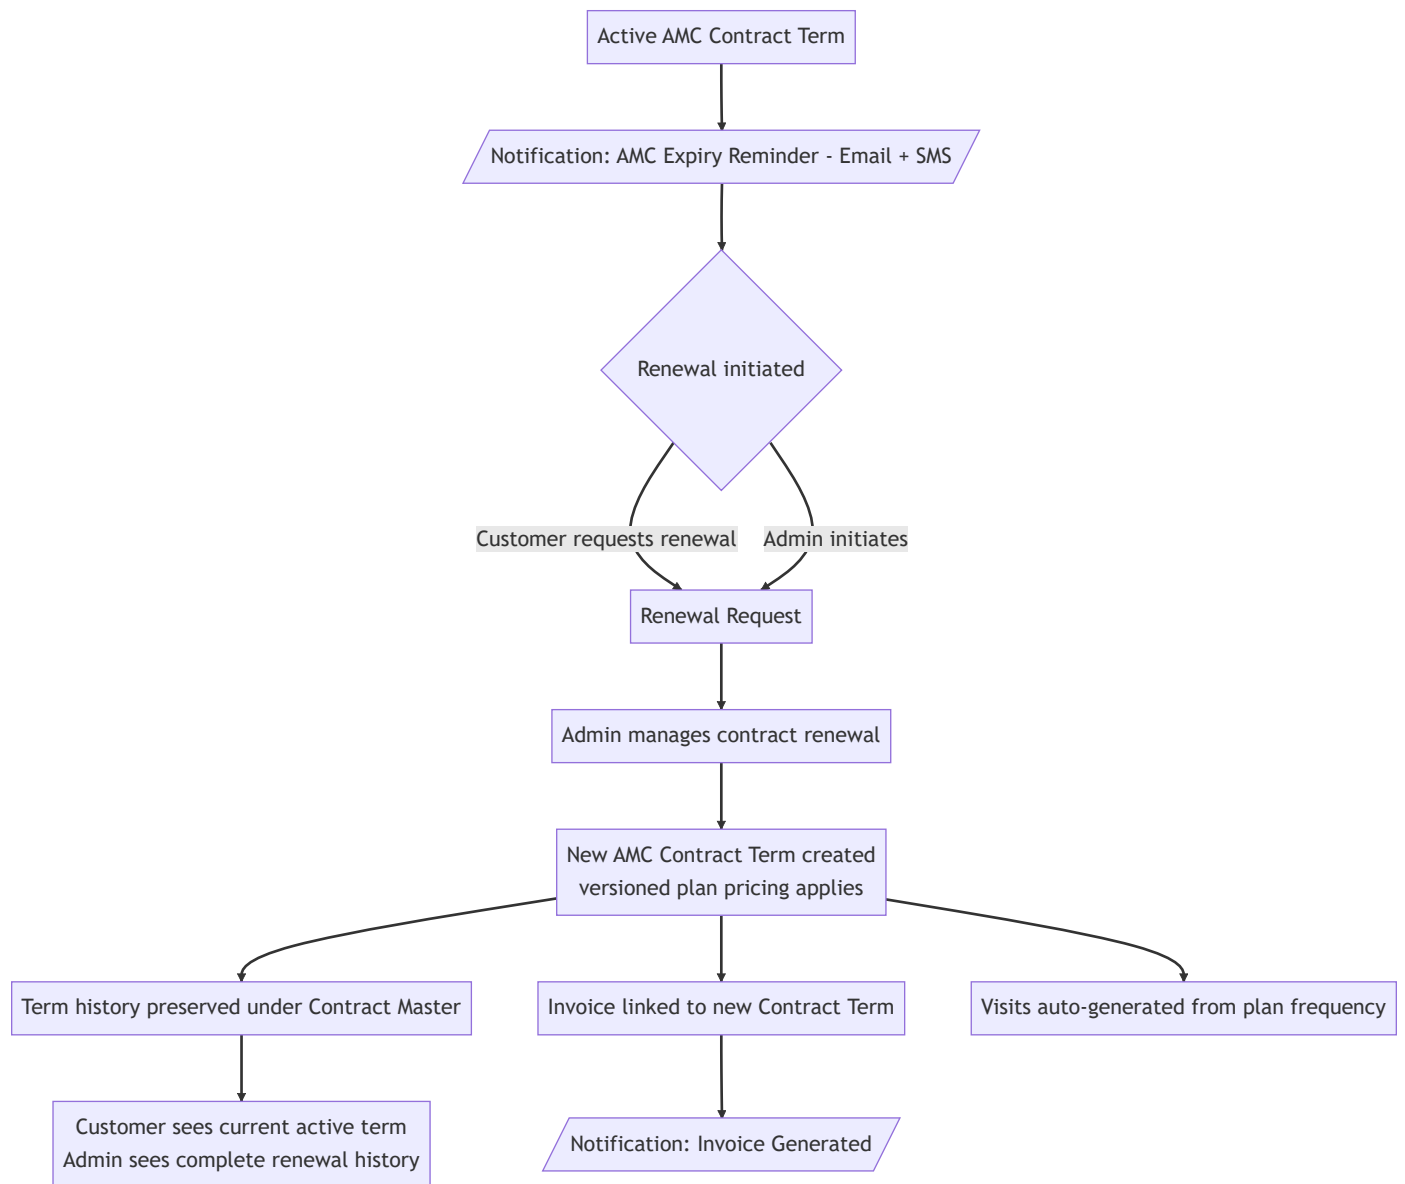

Lead status lifecycle

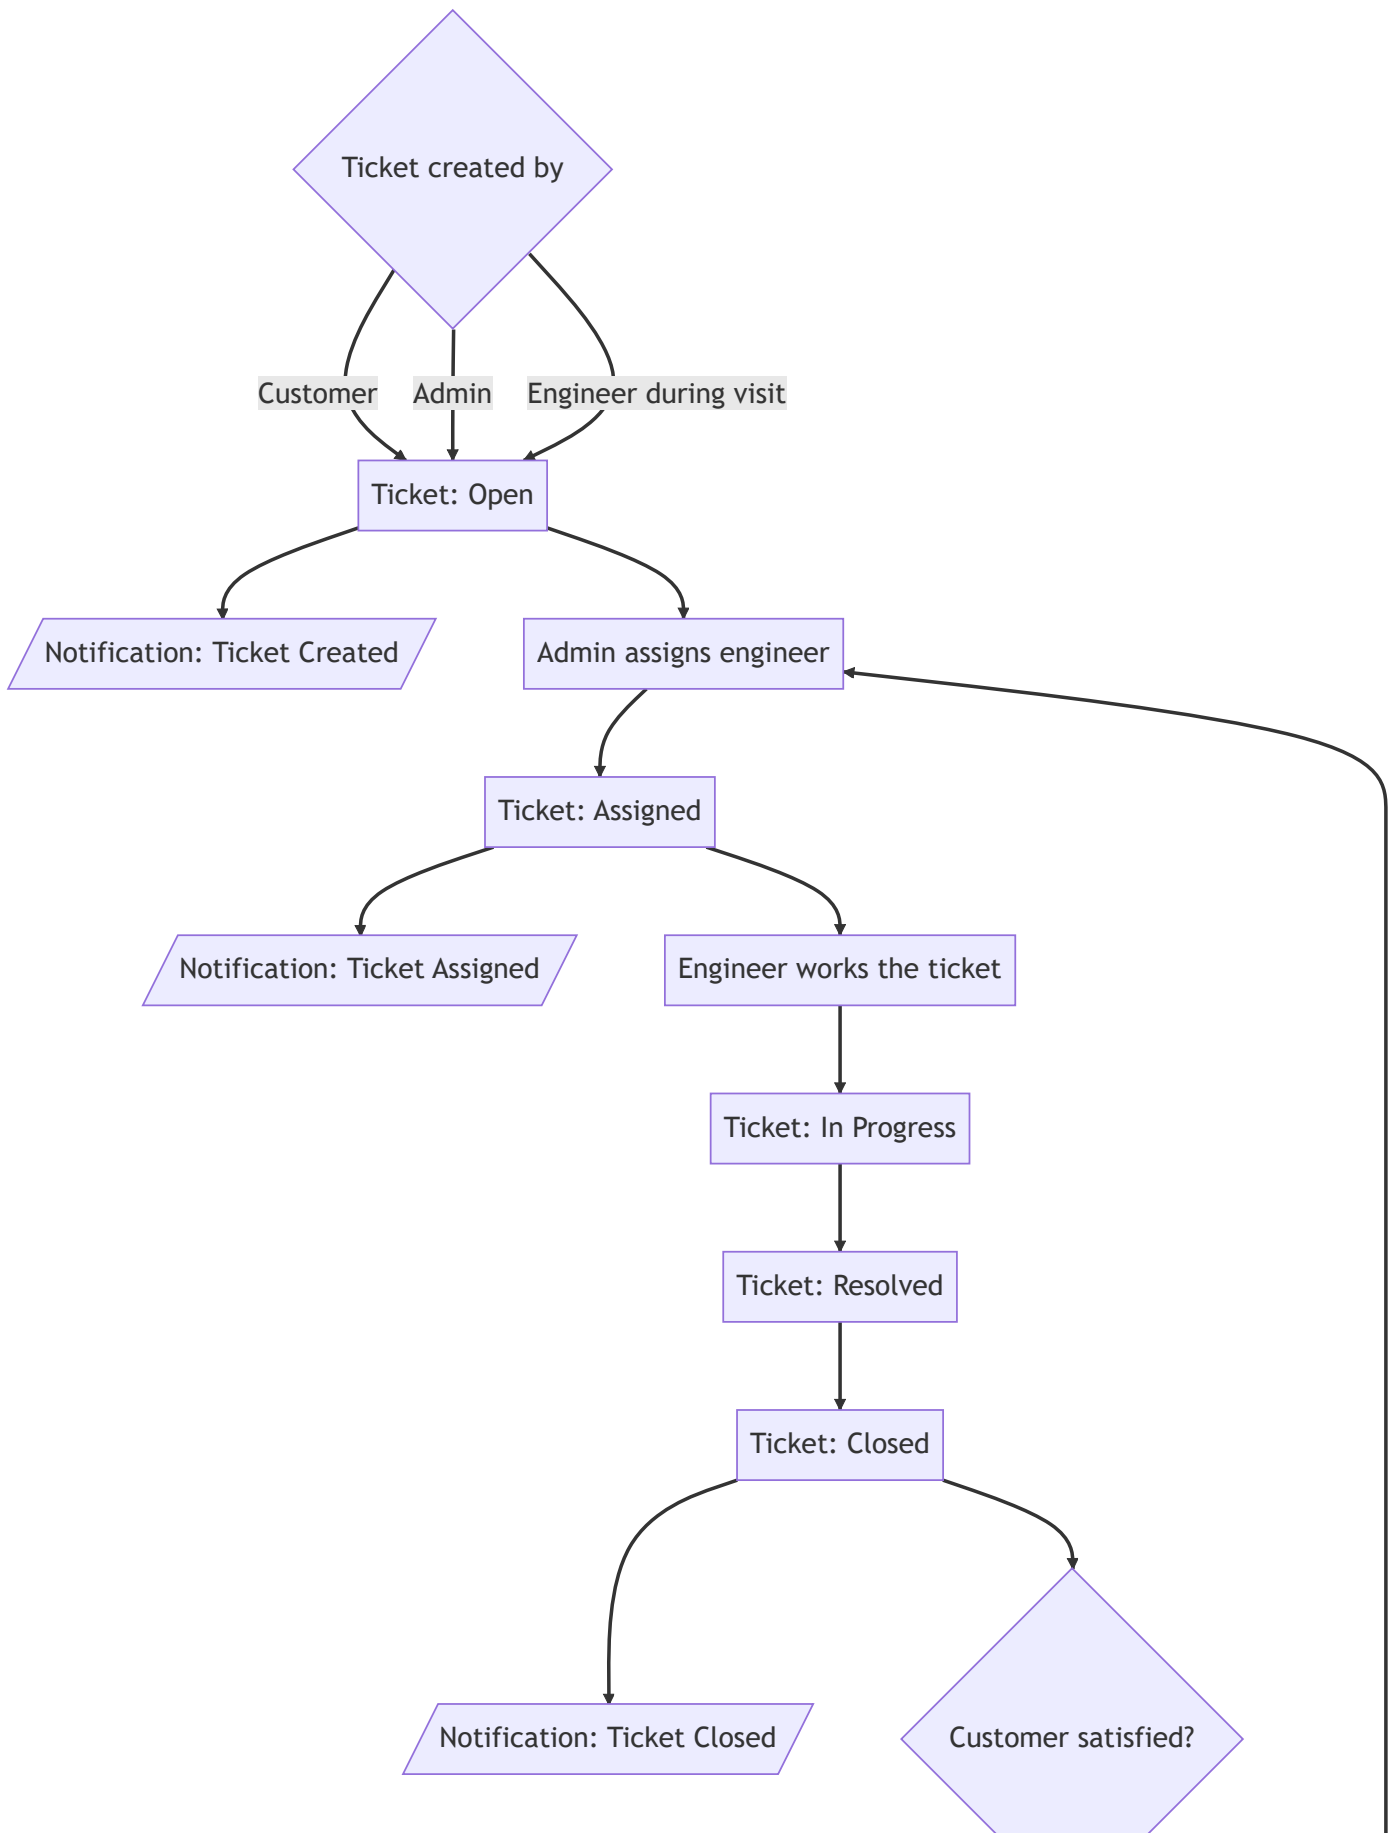

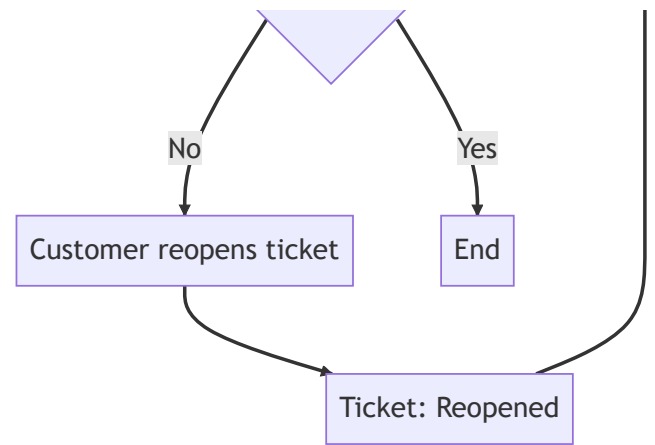

2. AMC Renewal (§8, §3, §17)

The AMC contract is permanent (master); each renewal adds a **Contract Term**. Customers see the current active term; admin sees full history.

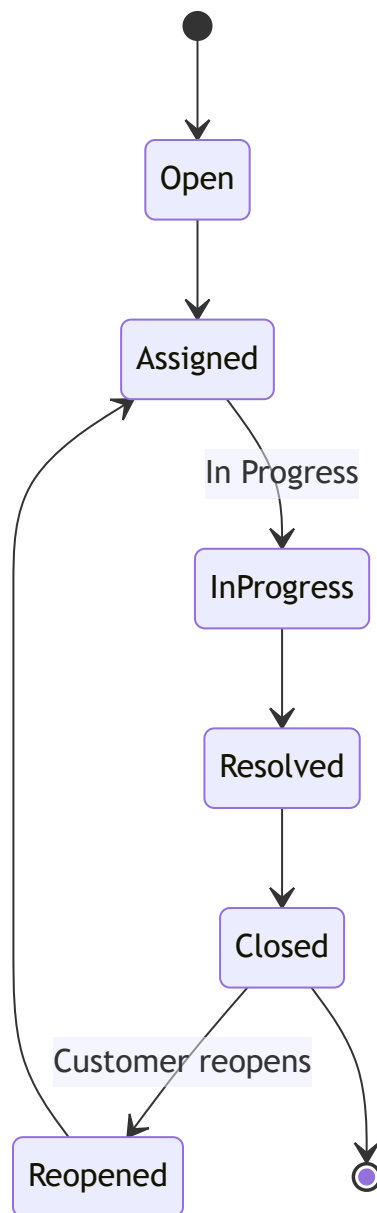

3. Ticket Resolution (§14, §17)

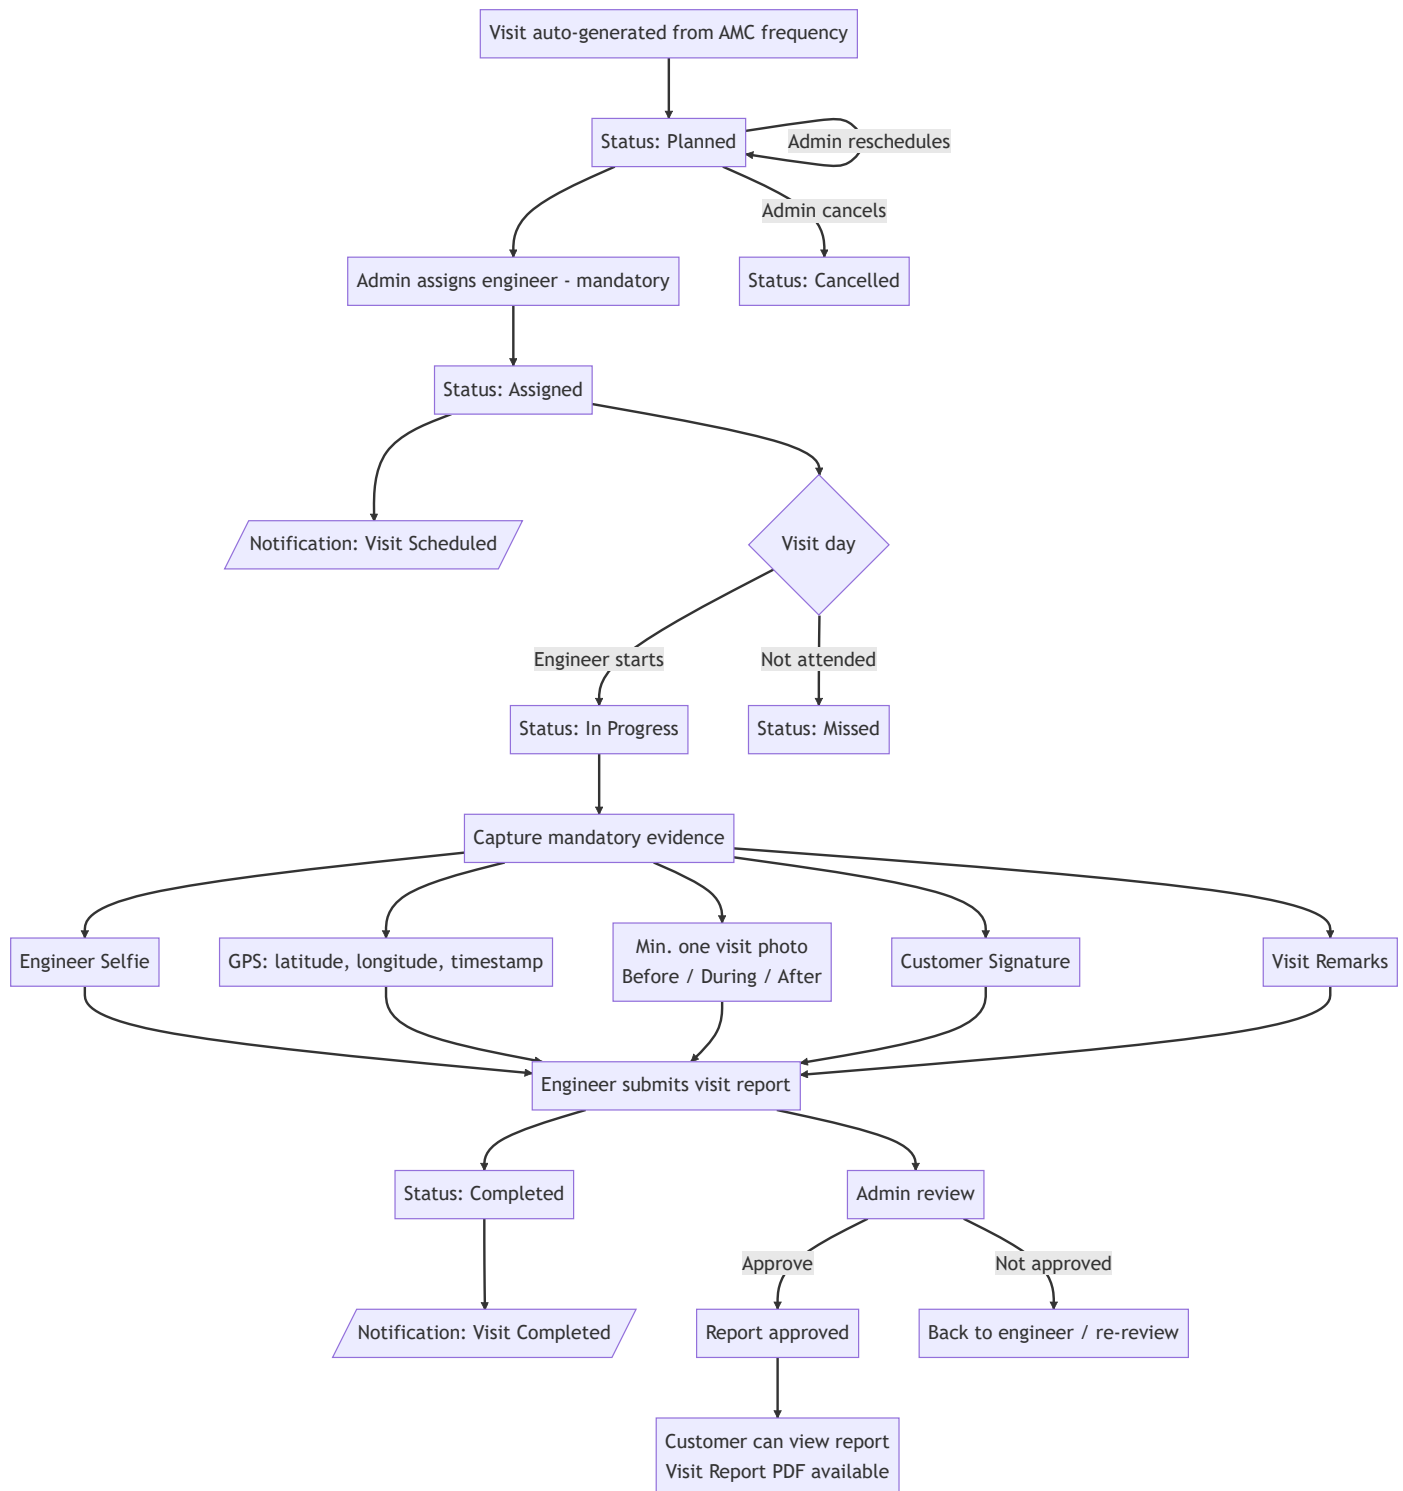

Ticket status lifecycle

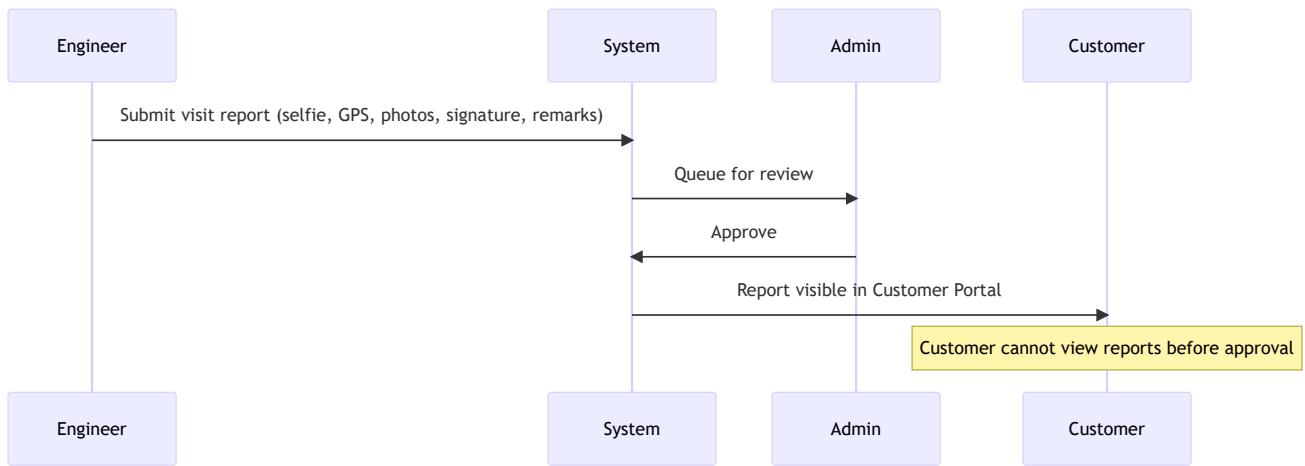

Priorities (applied at creation, §14): Low · Medium · High · Critical.

4. Service Visit (§11, §12, §13)

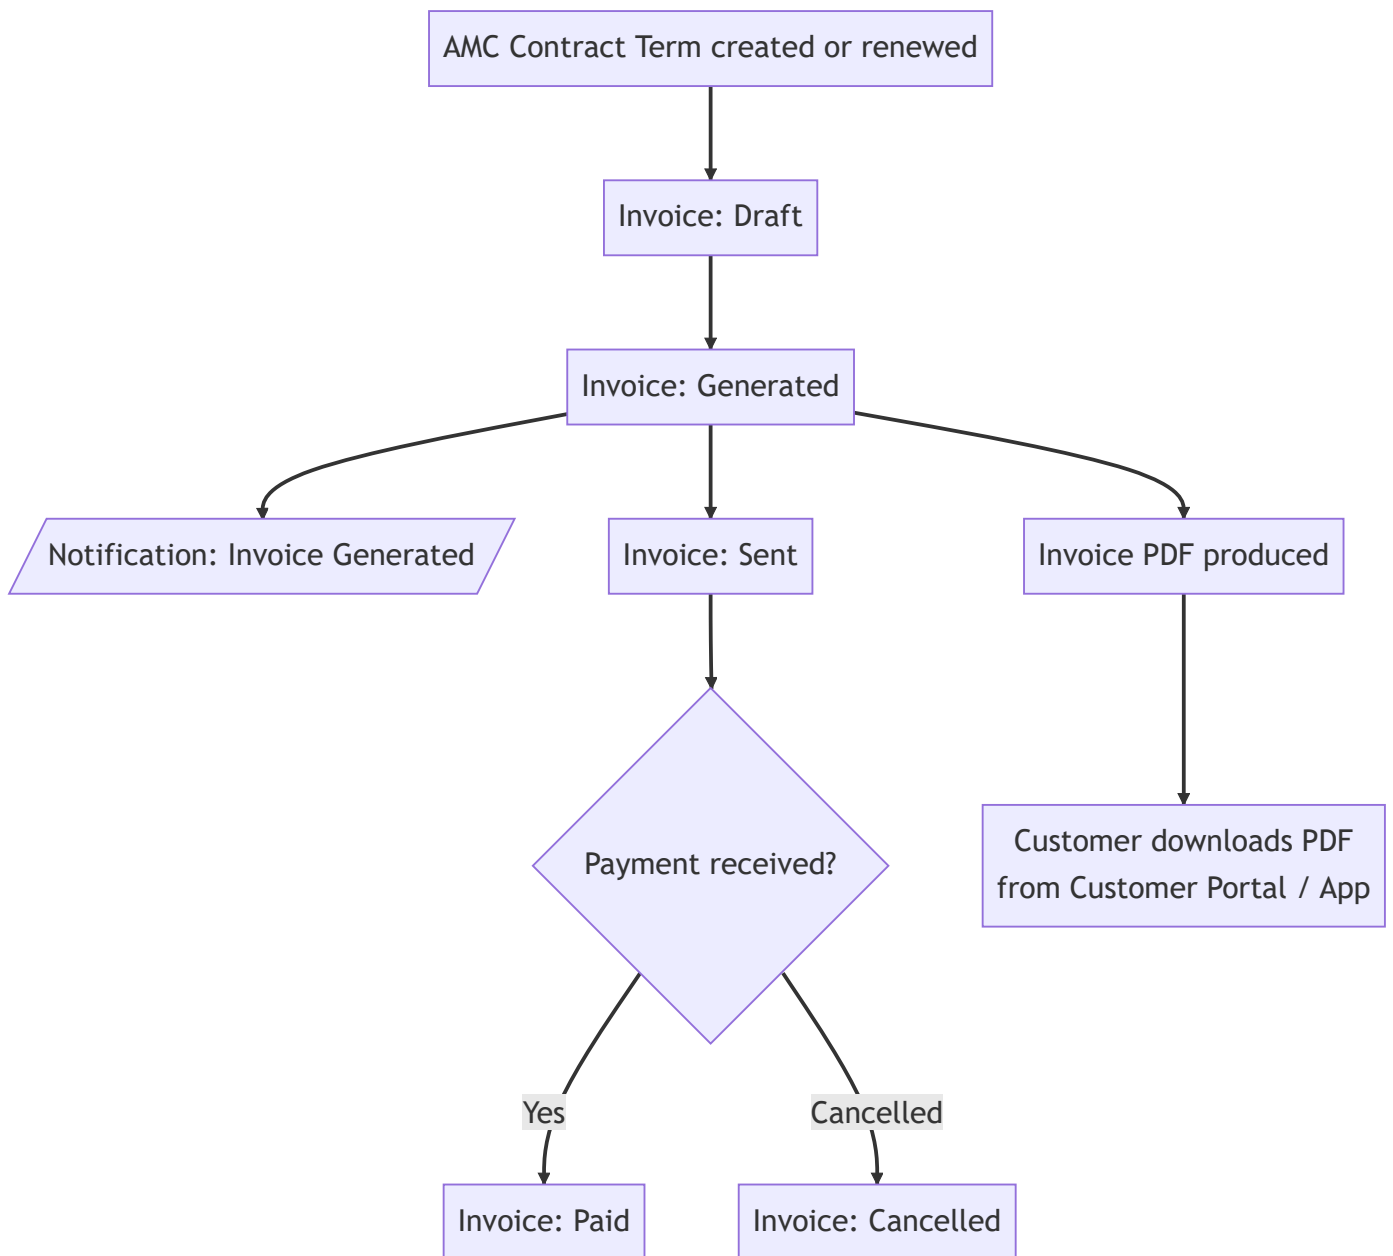

Covers scheduling lifecycle, mandatory completion evidence, and the approval gate.

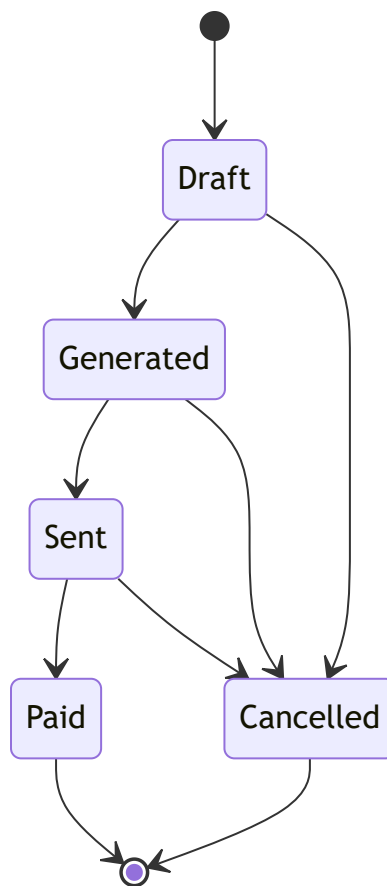

Visit approval gate (§13)

5. Invoice Generation (§16, §17, §19)

Invoice status lifecycle

Rules: invoice is linked to an AMC Contract Term; no accounting features in V1 (§16).

6. Engineer Assignment (§11, §14, §15)

Engineer assignment is mandatory for visits; tickets are assigned through the ticket lifecycle.
